EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with **Mr. Edwin D. Garlepp, Reg. No. 45,330 on 08/29/05.**

The application has been amended as follows:

Claims 11, 12, 16-25, 29, 38, and 39 (non-elected) have been cancelled;

Claim 1, lines 5 and 6 of the claim, following "between" in line 5 [an opposite side of] has been deleted and --a side of the substrate holder opposite to-- has been inserted.

Claim 13, line 6 of the claim, following "between" [an opposite side of] has been deleted and --a side of the substrate holder opposite to-- has been inserted.

2. The following is an examiner's statement of reasons for allowance:

Claims of record are allowable as amended by Applicant's amendment filed on 7/20/05 and further by the Examiner's amendment (see above). Objections to the drawings and 35 USC 112, first and second paragraphs rejections of the claims are no longer apply in view of the aforementioned amendments.

As to the merits, the allowability resides in the overall structure of the device as recited in independent claims 1 and 13 and, at least in part, because independent claim 1, as amended,

Art Unit: 2835

recites: “a cooling component positioned within an interior of the substrate holder” and “a heating component positioned within said interior of the substrate holder between a side of the substrate holder opposite to the supporting surface and the cooling component; and a contact volume positioned between the heating component and the cooling component”; and,

independent claim 13, as amended, recites:” a cooling component positioned within an interior of the substrate holder” and “a heating component positioned within said interior of the substrate holder between a side of the substrate holder opposite to the supporting surface and the cooling component; and first means for effectively reducing a thermal mass of the substrate holder”.

The aforementioned limitations in combination with all remaining limitations of claims 1 and 13, are believed to render said claims 1 and 13 and all claims dependent therefrom patentable over the art of record.

Additionally, claim 13 has been considered in light of 35 USC 112, six paragraph, because of the recitation of the “first means for effectively reducing a thermal mass of the substrate holder”. Said “first means” have been in details described in the subsection [0032] of the specification.

None of the references cited during prosecution of the instant application, either taken alone or in combination, is believed to render the present invention unpatentable as claimed.

3. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anatoly Vortman whose telephone number is 571-272-2047. The examiner can normally be reached on Monday-Friday, between 10:00 am and 6:30 pm..
